My questions (for the teacher):

- What do password hashing and salting mean, and how do they work? npm: argon2, bcrypt
- If external editors are allowed, Could you recommend any?
- I need to make the app compatible with mobile devices. Do I also need to make it compatible with tablets?
- Which database should I use? Should I use my own or the one provided by the teacher?
- I don't quite understand how to approach the design of this web system. Which design pattern would be more suitable? Could you give me some advice? mvc pattern, dao pattern.
- Should my blog system have draft save function?
